

VENIT – Viticulture & Enology: Innovation meets tradition – Field Course 2024

The field course activity consists in a list of practical meeting conducted directly in our vineyard facilities and scheduled for the second semester, tracking grapevine vegetative and reproductive activity. The scope of the activity is to undertake, with a strict practical perspective, all those agronomic techniques that, based on plant physiology and vine balance, are today available to optimize the vineyard management and results.

Date	Hours	Topic
22/02/2024 14:30	2	Spur-pruning
23/02/2024 10:30	2	Cane-pruning
29/02/2024 14:30	2	Training vines. How to set up a training system.
08/03/2024 10:30	2	Grafting
08/04/2024 14:30	2	Budbreak!
15/04/2024 14:30	2	Late winter pruning
22/04/2024 14:30	2	Vegetative phenology
06/05/2024 14:30	2	Reproductive activity of grapevines. Evolution of reproductive phenological stages, varietal traits.
13/05/2024 14:30	2	Early leaf removal. Inflorescences carbon exigencies, fruit set and effects on bunch compactness.
22/05/2024 14:30	2	Vine balance. Grapevine source/sink ratio and effects on reproductive activity. Cultural techniques to adjust vine balance. Shoot thinning, bunch thinning, leaf removal, canopy trimming.
